EXAMINER'S AMENDMENT

DETAILED ACTION

2. The following is an examiner's statement of reasons for allowance: The independent claims 1, 6, 1, and 21 disclose a balloon catheter with an inflation lumen, which is commonly known in the art, however also claimed is: "wherein the outer tubular member includes a plurality of distal openings; one or more cutting members coupled to the balloon, wherein the plurality of distal openings are arranged about the outer tubular member in one or more longitudinally aligned sets, and wherein the one or more cutting members are radially aligned with the longitudinally aligned sets." The prior art of Barbere (U.S. Patent No. 6,066,157) in view of Barath (U.S. Patent No. 5,616,149) and Adams et al., U.S. Patent No. 5,941,871 describe a similar system, but are lacking in one key component. The combination fails to disclose the cutting members and line of openings are aligned longitudinally. This component claimed in applicant's device is added to increase the effectiveness of the device and is lacking in the prior art. Therefore the independent claims and those that depend from them contain novel material and are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Allowable Subject Matter

3. Claims 1 and 4-27 are allowed.
